## High temperature flow cell #2

Beamline: BXDS

**Contact: Beatriz Diaz Moreno** 

Provides sample temperatures up to 1273 K (+1000 °C) with gas flow. Samples are in capillary format, and two can be loaded at a time. Quartz capillaries are available at the BXDS beamlines.

Based on the popular P. Chupas design. More information can be found in P. J. Chupas et al., J. Appl. Cryst. 41, 822 (2008).

## Ramping up
