

Glovebox-integrated XES endstation

Beamline: SXRMB

Contact: Mohsen Shakouri

A glovebox on a beamline! The glovebox is typically filled with helium, and it contains an x-ray emission spectrometer. Si(111) and Si(220) crystals are available. More information can be found in M. Shakouri et al., *Electronic Structure* 2, 047001 (2020).
